Bancroft Fund Ltd. operates as a closed-end, diversified management investment company and invests primarily in convertible securities, with the objectives of providing income and the potential for capital appreciation ~ which objectives the Fund considers to be relatively equal, over the long-term, due to the nature of the securities in which it invests.

The above data is from Bloomberg L.P. pricing service, with the exception of the Lehman Aggregate Bond Total Return Index which is from Lipper, Inc. Closed-End Fund Performance Analysis, dated April 30, 2008.

Bancroft's performance in the table above has not been adjusted for the fiscal 2004 rights offering, or the tender offer which expired earlier this year; net asset value dilution was 2.38% and 0.85%, respectively. Volatility is a measure of risk based on the standard deviation of the return. The greater the volatility, the greater the chance of a profit or risk of a loss. Performance data represent past results and do not reflect future performance.

To Our Shareholders

May 9, 2008

The current calendar year has seen the convertible securities market, as measured by the Merrill Lynch All Convertibles Index, outperform the major equity market indices as well as U.S. corporate bonds, while underperforming high yield U.S. corporate bonds. Within the convertible universe, Merrill Lynch reports that speculative grade convertibles have outperformed investment grade convertibles, which may be because small and midcap stocks have outperformed large capitalization stocks.

As some alternative forms of financing have been substantially reduced by the de-leveraging of investment banks, many issuers are turning to convertible securities as the most viable source for raising capital. This development has become especially true of finance companies and banks. The first five months of 2008 has seen a net increase in U.S. convertible securities outstanding of over \$20 billion, raising convertible market value to \$333.5 billion from \$313.1 billion, as measured by Merrill Lynch. Average yields rose as many new issues came to market with over 7% yields. Average conversion premiums have actually fallen slightly to approximately 42% and parity delta (a measure of the sensitivity of the price of a convertible security to movements in the price of the underlying common stock) is around 65%, which is historically within the normal range of the market. These numbers, measured by Merrill Lynch, appear to us to be indicative of a healthy convertible market. In this changing financial environment, we believe that reasonable investment opportunities are available in convertible issue form from many different companies and industries.

Performance in the Fund's second fiscal quarter was enhanced by its exposure to the Minerals and Mining and Energy industries. Among the better performing issues in the portfolio were McMoRan Exploration Co. (Energy), Oil States International, Inc. (Energy) and Freeport-McMoRan Copper & Gold Inc. (Minerals and Mining). Performance was held back by exposure to the Computer Software and Telecommunications industries.

Bancroft's market return, with dividends reinvested, outperformed the Merrill

Lynch All Convertibles Index (the "Index") over the one-year period ended April 30, 2008, while underperforming over the five- and ten-year periods. The Fund's NAV, also with dividends reinvested, after adjustment for fund expenses (the Index includes no expenses), and for the Fund's fiscal 2004 rights offer and the February 2008 tender offer, outperformed the Index over the one- and five-year periods. Although the Fund's performance over the ten-year period was comparable to that of the Index, over that time period the Fund's volatility, as measured by the standard deviation of both market performance and NAV performance, was substantially lower than that of the Index for that time period. Many market professionals consider the volatility of past returns to be a useful approximation of past levels of financial risk. A higher volatility level is considered to equate to a higher measure of risk, and thus the Fund's results were achieved with lower levels of risk than that implied by the Index. This measure of historic results may not reflect future performance but we believe that it is informative. The Fund has sought to provide total returns to shareholders that compare favorably to those of the equity markets with less volatility.

There are many closed-end funds that make use of leverage through the issuance of Auction Rate Preferred Shares (ARPS). These shares are designed to have their dividend rate set through a periodic auction, usually every 7 to 35 days. When a successful auction occurs, holders who wish to liquidate their holdings may do so. If the auction does not attract sufficient bids to clear

the market, the remarketing agent (usually a bank) generally steps in to fill the gap. This system functioned for twenty years with only an occasional auction failure. During the first calendar quarter of 2008 many agents refused to step in and so many auctions failed. Although such auction failures did not mean that the ARPS were in danger of default, holders who wished to liquidate their positions could not do so. The issuers have had to pay a penalty rate until the auctions were successful or the ARPS were redeemed. At this time, 25% of existing ARPS issued by closed-end funds have been called, with more expected to follow. Bancroft has never issued any preferred shares and so has not been subjected to the uncertainties created in the market by these recent events.

The results of the 2008 annual meeting of shareholders are shown in the Miscellaneous Notes section of this report. We thank you for your support. During the past quarter the Fund conducted a successful tender offer which concluded on February 29th with the purchase of 14.5% of the outstanding shares of the Fund. At its May meeting, the Board of Trustees declared a dividend of \$0.21 per share. The dividend consists of undistributed net investment income and will be payable on June 26, 2008 to shareholders of record on June 12, 2008.

Notes to Financial Statements (unaudited)

NOTE 1 - ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

(a) Organization - Bancroft Fund Ltd. (the "Fund"), is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company.

(b) Use of Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

(c) Indemnification - Under the Fund's organizational documents, each trustee, officer or other agent of the Fund (including the Fund's investment adviser) is indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. The risk of material loss as a result of such indemnification is considered remote.

(d) Federal Income Taxes - The Fund's policy is to distribute substantially all of its taxable income within the prescribed time and to otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. Therefore, no provision for federal income or excise taxes is believed necessary.

On July 13, 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48 "Accounting for Uncertainty in Income Taxes" (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax return to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax

positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. The interpretation became effective for tax years beginning after December 15, 2006. The adoption of FIN 48 has had no impact on the Fund's financial statements.

Notes to Financial Statements (continued)

NOTE 1 - ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Security Valuation - Investments in securities traded on a national securities exchange are valued at market using the last reported sales price, supplied by an independent pricing service, as of the close of regular trading. Listed securities, for which no sales were reported, are valued at the mean between closing reported bid and asked prices as of the close of regular trading. Unlisted securities traded in the over-the-counter market are valued using an evaluated quote provided by the independent pricing service, or, if an evaluated quote is unavailable, such securities are valued using prices received from dealers, provided that if the dealer supplies both bid and asked prices, the price to be used is the mean of the bid and asked prices. The independent pricing service derives an evaluated quote by obtaining dealer quotes, analyzing the listed markets, reviewing trade execution data and employing sensitivity analysis. Evaluated quotes may also reflect appropriate factors such as individual characteristics of the issue, communications with broker-dealers, and other market data. Securities for which quotations are not readily available, restricted securities and other assets are valued at fair value as determined in good faith pursuant to procedures approved by the Board of Trustees. Short-term debt securities with original maturities of 60 days or less are valued at amortized cost.

(f) Security Transactions and Related Investment Income - Security transactions are accounted for on the trade date (date the order to buy or sell is executed) with gain or loss on the sale of securities being determined based upon identified cost. Dividend income is recorded on the ex-dividend date and interest income is recorded on the accrual basis, including accretion of discounts and amortization of non-equity premium. For certain securities, known as "contingent payment debt instruments," Federal tax regulations require the Fund to record non-cash, "contingent" interest income in addition to interest income actually received. Contingent interest income amounted to 6 cents per share for the six months ended April 30, 2008. In addition, Federal tax regulations require the Fund to reclassify realized gains on contingent payment debt instruments to interest income. At April 30, 2008 there were unrealized losses of approximately 14 cents per share on contingent payment debt instruments.

(g) Change in Method of Accounting - Effective November 1, 2004, the Fund began amortizing discounts and premiums on all debt securities. Prior to November 1, 2004, the Fund amortized discounts on original issue discount debt securities. The new method of amortization was adopted in accordance with the provisions of the AICPA Audit and Accounting Guide, Audits of Investment Companies and the financial highlights presented herein have been restated to reflect the new method retroactive to November 1, 2001. The effect of this accounting change is included in the financial highlights for the years ended October 30, 2003 and 2004. The cumulative effect of this accounting change had no impact on the total net assets of the Fund or on distributions for tax purposes, but resulted in a \$103,986 increase in the cost of securities held and a corresponding \$103,986 reduction in the net unrealized gains based on the securities held on November 1, 2001. These changes had no effect on previously reported total net assets or total returns.

(h) Distributions to Shareholders - Distributions to shareholders from net investment income are recorded by the Fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid annually. The amount and character of income and capital gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. The tax character of distributions paid during the fiscal years ended October 31, 2007 and 2006 were as follows:

	2007	2006
Ordinary Income	\$5,102,460	\$4,395,566

Net Realized Gain on Investments	2,621,312	--
	-----	-----

NOTE 1 - ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

At April 30, 2008 unrealized appreciation (depreciation) of investment securities on a tax basis were as follows:

Unrealized appreciation	\$ 8,861,127
Unrealized depreciation	(9,148,005)
Net unrealized depreciation	(286,878)

Cost for federal income tax purposes \$105,744,373

(i) Accounting Pronouncements - In September 2006, the Financial Accounting Standards Board (FASB) issued Statement on Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements." This standard establishes a single authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair value measurements. SFAS No. 157 applies to fair value measurements already required or permitted by existing standards. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The changes to current generally accepted accounting principles from the application of this Statement relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurements. As of April 30, 2008, the Fund does not believe the adoption of SFAS No. 157 will impact the financial statement amounts, however, additional disclosures may be required about the inputs used to develop the measurements and the effect of certain of the measurements on changes in net assets for the period.

NOTE 2 - MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

The Fund has entered into an investment advisory agreement with Davis-Dinsmore Management Company ("Davis-Dinsmore"). Pursuant to the investment advisory agreement, Davis-Dinsmore provides the Fund with investment advice, office space and facilities. Under the terms of the investment advisory agreement, the Fund pays Davis-Dinsmore on the last day of each month an advisory fee for such month computed at an annual rate of 0.75% of the first \$100,000,000 and 0.50% of the excess over \$100,000,000 of the Fund's net asset value in such month.

The Fund, pursuant to an administrative services agreement with Davis-Dinsmore, has agreed to pay Davis-Dinsmore for certain accounting and other administrative services provided to the Fund. Under the administrative services agreement, the Fund pays Davis-Dinsmore on the last day of each month a fee for such month computed at an annual rate of 0.05% of the Fund's net asset value in such month.

Certain officers and trustees of the Fund are officers and directors of Davis-Dinsmore.

Tender Offer

On January 31, 2008 the Fund commenced a tender offer for up to 758,754 of its shares of beneficial interest, representing approximately 12.5% of its issued and outstanding shares of beneficial interest, par value \$.01 per share, at a price per share equal to 95% of the net asset value per share as of the close of regular trading on the American Stock Exchange on February 29, 2008. The Fund conducted the Offer pursuant to an Agreement dated January 11, 2008 between the Fund and certain Fund shareholders.

The tender offer expired on February 29, 2008. The Fund accepted 880,154 properly tendered shares at a price per Fund share equal to \$19.36, which was 95% of the net asset value per Fund share as of 5:00 p.m. Eastern Standard Time on February 29, 2008.

Approximately 2,294,566 shares of beneficial interest, 38% of the Fund's issued and outstanding shares of beneficial interest, were validly tendered. Because more than 758,754 shares had been validly tendered, the Fund elected to take up and pay for 121,400 additional shares for a total of 880,154 total shares to be taken up and paid for pursuant to the Offer. Shares were accepted for payment on a pro rata basis. Accordingly, approximately 38.36% (880,154 shares accepted for payment divided by 2,294,566 shares validly tendered) of the validly tendered shares of each shareholder were accepted for payment. These accepted shares represented approximately 14.5% of the total shares of beneficial interest outstanding prior to the commencement of the tender offer.

The Fund is a member of the Closed-End Fund Association, a non-profit national trade association (www.cefa.com). Thomas H. Dinsmore is on the Executive Board and is president of the association. The association is solely responsible for the content of its website.

ITEM 11. CONTROLS AND PROCEDURES.

Conclusions of principal officers concerning controls and procedures

(a) As of June 5, 2008 an evaluation was performed under the supervision and with the participation of the officers of the Registrant, including the

Based on that evaluation, as required by Rule 30a-3(b) under the Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Exchange Act (17 CFR 240.13a-15(b) or 240.15d-15(b)), the Registrant's officers, including the PEO and PFO, concluded that, as of June 5, 2008, the Registrant's disclosure controls and procedures were reasonably designed so as to ensure: (1) that information required to be disclosed by the Registrant on Form N-CSR is recorded, processed, summarized and reported within the time periods specified by the rules and forms of the Securities and Exchange Commission; and (2) that material information relating to the Registrant is made known to the PEO and PFO as appropriate to allow timely decisions regarding required disclosure.

(b) There have been no changes in the Registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Act (17 CFR 270.30a-3(d))) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.
