Bancroft Convertible Fund, Inc. (the "Fund") operates as a closed-end, diversified management investment company and invests primarily in convertible securities, with the objectives of providing income and the potential for capital appreciation -- which objectives the Fund considers to be relatively equal, over the long-term, due to the nature of the securities in which it invests.

TO OUR SHAREHOLDERS

With the passage of a stimulative tax cut package and the upward movement of the stock market the economic slowdown of the past few years should be coming to an end. The decline in stock prices that began in March 2000 took the S&P 500 Index which was over 1500, to under 800 three times, the last in March 2003. Since then, the S&P 500 has moved up to near 1000. Historically, advances of this magnitude (roughly 25%) signal that a pick up in economic activity is near. If indeed the economy picks up as we expect, then the growth that should occur in corporate earnings should help the stock market to advance further. This may also signal the end of the rise in bond prices that we have seen since January 2000.

Current economic conditions have affected the convertible securities markets. The low interest rate environment has reduced the rates paid on new issues of convertibles and, generally, the convertible market has become more interest rate sensitive and less equity sensitive. Since we believe that there is a significant probability of an interest rate rise as economic activity picks up, we have sought to reduce interest rate risk by buying convertibles that have relatively short maturities or that have "put" features that allow us to sell the bonds back to the issuer at a set price. We have also sought to increase the equity sensitivity of the portfolio by purchasing convertible issues known as "mandatories." These issues automatically convert to common stock upon maturity.

A basic premise under which the Fund operates is that convertible securities can offer equity-like performance with less volatility over complete market cycles. As indicated on the chart on the facing Highlights page, the Fund's net asset and market values outperformed the Closed-end Convertible Fund average and the Russell 2000 Index for the one year, five year and ten year periods ended April 30, 2003. The Fund also outperformed the S&P 500 Index for the one year and five year periods ended April 30, 2003. We believe that past outperformance of these important indices and of our peer category, while no guarantee of future returns, is an historical validation of this premise.

The Fund's website (www.bancroftfund.com) contains press releases, dividend information and daily net asset values. The Closed-End Fund Association (www.cefa.com), of which the Fund is a member, is another source of information on many closed-end funds.* Based upon data through May 31, 2003, Morningstar ** has continued to rate the Fund's performance at four stars (above average) overall as measured on the "Quicktake Report" on their website. In addition, shareholders who wish to obtain a copy of the most recent report on the Fund issued by Standard and Poor's should contact us.

The results of the 2003 annual shareholders' meeting are shown in the Miscellaneous Notes section of this report. Thank you for your support.

At its May meeting the Board of Directors declared a dividend of 16 cents

per share. The dividend consists of undistributed net investment income. This dividend will be payable on June 27, 2003 to shareholders of record on June 13, 2003.

Notes to Financial Statements (unaudited)

1. Significant Accounting Policies

Bancroft Convertible Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements:

Investments in securities traded on a national securities exchange are valued at market using the last reported sales price as of the close of regular trading. Securities traded in the over-the-counter market and listed securities for which no sales were reported are valued at the mean between reported bid and asked prices as of the close of regular trading. Where no closing prices are available, value is determined by management, with the approval of the Board of Directors.

(b) Securities Transactions and Related Investment Income

Security transactions are accounted for on the trade date (date the order to buy or sell is executed) with gain or loss on the sale of securities being determined based upon identified cost. Dividend income is recorded on the ex-dividend date and interest income is recorded on the accrual basis, including accretion of discounts and amortization of non-equity premium. For certain securities, known as "contingent payment debt instruments," Federal tax regulations require the Fund to record non-cash, "contingent" interest income in addition to interest income actually received. Contingent interest income amounted to 4 cents per share for the six months ended April 30, 2003.

(c) Federal Income Taxes

It is the policy of the Fund to distribute substantially all of its taxable income within the prescribed time and to otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. Therefore, no provision for federal income or excise taxes is believed necessary. The Fund has capital loss carryovers of approximately \$2,328,000 and \$5,478,000 available to offset any future net capital gains which will expire on October 31, 2009 and October 31, 2010, respectively.

(d) Dividends and Distributions to Shareholders

The liability for dividends and distributions payable is recorded on the ex-dividend date.

14

Notes to Financial Statements (continued)

(e) Market Risk

It is the Fund's policy, under normal circumstances, to invest at least 80% of its assets in convertible securities. Although convertible securities do derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Fund's investments, known as Mandatory Convertible Securities, include features which render them more sensitive to price changes in their underlying securities. Thus they expose the Fund to greater downside risk than traditional convertible securities, but still less than that of the underlying common stock. At April 30, 2003, the market value of such securities was \$15,646,375, representing 17% of net assets.

2. Management Fee and Other Transactions with Affiliates

The management fee is paid to the investment adviser, Davis-Dinsmore Management Company (the "Adviser"). The contract provides for payment of a monthly advisory fee, computed at an annual rate of 3/4 of 1% of the first \$100,000,000 and 1/2 of 1% of the excess over \$100,000,000 of the Fund's net asset value in such month.

The Adviser invests the Fund's assets, furnishes office equipment and facilities, and pays the salaries of all executive officers of the Fund, except that the costs associated with personnel and certain non-personnel expenses of the office of the Treasurer, up to a maximum of \$25,000 a year, are reimbursed by the Fund. Such reimbursements amounted to \$12,500 for the six months ended April 30, 2003. The officers of the Fund are also directors, officers or employees of the Adviser, and are compensated by the Adviser.

3. Portfolio Activity

At April 30, 2003 there were 4,725,858 shares of \$.01 par value common stock outstanding, (9,000,000 shares authorized). During the six months ended April 30, 2003, 41,388 shares were issued in connection with reinvestment of dividends from net investment income, resulting in an increase in paid-in capital of \$742,900.

Purchases and sales of investments, exclusive of corporate short-term notes, aggregated \$31,909,111 and \$37,970,671, respectively, for the

six months ended April 30, 2003.

A distribution of \$0.16 per share from net investment income was declared on May 15, 2003, payable June 27, 2003 to shareholders of record at the close of business June 13, 2003.
